

As a xm subscriber I feel that the weather and traffic channels are a great help to me since I am a truck driver and i drive through these towns all the time and need to know what is going on in them when I have to travel through them. The fact that I pay for xm. Should mean that whatever they put on there list of things to make available for me to listen to I should be acble to listen to them with no hassles. The one thing that I wish they had. Is more cities with the option of the weather and traffic. I can name a bucnh that need that option. Thank you. Glen Kirk
